

Planet G has a variety of Inspection Systems, Conveyors and Special Purpose Machines with standard and customized options that can improve the efficiency and productivity of a production facility.

Inspection Systems

We manufacture high-speed inspection systems that can be used in pharmaceutical, automotive, food, FMCG and print industries. Our solutions include label inspection, text/barcode/pharma code verification, bottle & print inspection, track & trace systems and part presence verification.

Conveyor Systems

From custom conveying solutions to configurable standard conveyors, Planet G offers solutions that cater to all types of material handling needs. We manufacture belt, trolley, vibrating, vertical, slat and sorting conveyors that increase productivity.

Special Purpose Machines

Planet G's SPMs are manufactured according to the specific requirements of customers. Our machines aid in reducing human effort and minimizing rejection, thus improving quality, efficiency and productivity. Our SCADA-interfaced SPMs such as bottle accumulators, pick and place systems, palletizers and cartonizers can directly communicate and post data to ERP systems.
